Portfolio

Technical Skills

Blender, 3DS Max, Zbrush, C#,

UE5, Substance suite, Marmoset

Toolbag, Unity, Github, Maya

Education

3D Modeling for Games 2024
The Vertex Guild Academy

UE5 Modular Environments 2023
Computer Graphics Master Academy

Bachelors in Videogames
2019 - 2023
Universidade Lusófona - (ULHT)

Game and Interactive Media Design 2019
Lisbon School of Design

Awards

Spotlight Awards 2022 | Best Student Game

Over & Out 2022 | Best Game

Fnac Talents | Honourable mention

Languages

Native – English, Portuguese

Basic - Spanish

Work Experience

Universidade Lusófona de Humanidades e Tecnologias

Teacher

Sep 2024 - PRESENT

- Teaching "Art and Environment Creation" and "Cinematics" subject at Lusófona
- Guide and teach students through the initial stages of their projects, including moodboards, sketching, asset planning and blockout of their environments

Nerd Monkeys

Environment Artist

Mar 2025 - PRESENT

- Create assets for different game projects and handle Unity implementation
- Create shaders and lighting setups in Unity as well as coding when necessary to create new features
- Give feedback and guide interns on their contributions to their projects

Additional Experience

Vertex Guild Academy

- A year focused on learning from Vertex Guild on various 3D subjects such as texturing, scultping, modelling.
- Create an environment in UE5 using common industry practices like texel density, channel packing, tilable textures and creation of decals for details.
- Create a hero props for portfolio showcase
- Engage with various other 3D software for exploration purposes such as Marvellous, Fibershop, Plantfactory

Modding

- Modded for: Skyrim, Vermintide 2
- Utilization of Creation Kit gaining a better understanding of modular workflows and the importance of Light & FX to create mood in the scene
- Learning to mimic/adapt to art styles quickly (Vermintide2 mod example)
- Utilization of custom shaders and add-ons in Blender and Substance Painter
- Understanding and breaking down art workflows from different games

Lectures

- Lectured at Lisbon Games Week 2021-2023
- Learned to break down concepts to their key points for clearer teaching
- Have a deep understanding of 3D and its multiple workflows as well as software agnostic knowledge
